

# Carbon Reduction Plan Template

Supplier Name: Snackline Direct Ltd

Publication Date: April 2026

## Commitment to achieving Net Zero

Snackline Direct Ltd is committed to achieving Net Zero emission\* by 2040.

## Baseline Emission Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2022/2023 01 /04/22 to 31 /03/23	
Additional Details relating to the Baseline Emissions calculations	
Emissions data had not been published in prior years therefore we selected 2023 as our base year.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO2e)
Scope	42.24
Scope 2	28.8
Scope 3	74.4
Total Emissions	145.44

## Baseline year Emmissions:

Reporting Year:	2023/2024 01 /04/23 to 31 /03/24
EMISSIONS	TOTAL (tCO2e)
Scope 1	38.8
Scope 2	25.1
Scope 3	73.9
Total Emissions	137.8

Current Emissions Reporting

Reporting Year:	2024/2025
EMISSIONS	TOTAL (tCO2e)
Scope 1	36.5
Scope 2	23.8
Scope 3	71.0
Total Emissions	131.30

## Emissions Reduction Targets

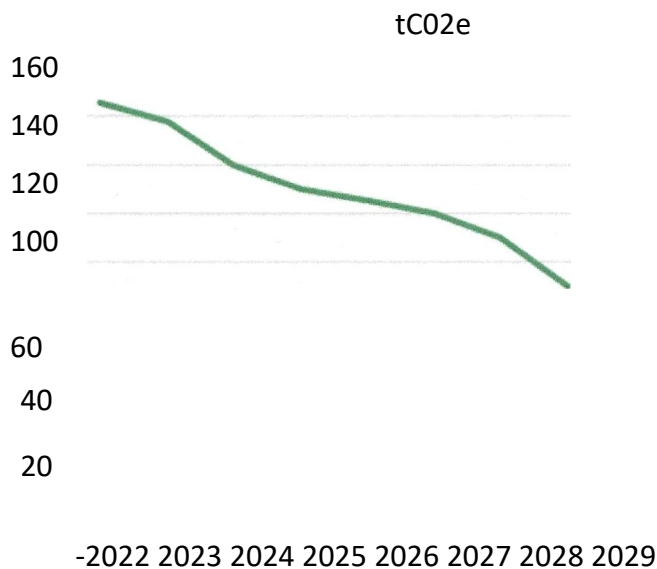

Snackline had no previous emission reduction commitment

To continue our progress to achieving Net Zero since the baseline 31 /03/23, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 80 tCO2e by 2029 This is a reduction of 42% and the projection to reach net zero carbon by 2040 worst case scenario. It is envisaged that carbon offsetting or technology such as carbo capture and storage will be deployed to achieve the difference between actual and net zero carbon.

**Progress against these targets can be seen in the graph below:**

2023 to 20204 are actual and to 2029 are projected

## **Carbon Reduction Projects**

The following environmental management measures and projects have been implemented since the 2023 baseline. The carbon emission reduction achieved by these schemes equate to 7.64 tCO<sub>2</sub>e a 6% reduction against the 2023 baseline and the measures will be in effect when performing the contract.

1. Move to agile working that has resulted in reduction of company business travel and commuting.
2. Launched fully electric lease scheme for office staff.
3. Staff use video conferencing.
4. Installation of LED lighting in all areas of the business.
5. Building management systems have been upgraded to reduce energy use.
6. All single use plastic removed from office and canteen areas.
7. Offset any unavoidable business travel carbon emissions going forward with Climatecare.org.
8. Repair/reuse of IT equipment. Any equipment that cannot be reused or repaired will be sourced from a supplier that refurbishes equipment.
9. Initiated ESG supply chain assessment. This incorporates new methodology with suppliers required to answer questions relating to their carbon emissions and carbon reduction plans. The aim is to use this as a fresh approach to more accurately measure Scope 3 emissions with actual emissions data.
10. Start the replacing of all company vehicles with electric versions.

## **In the future we hope to implement further measures such as:**

1. To install onsite renewable energy sources through solar panel installation.
2. Work with the landlord to ensure purchase of 100% renewable
3. Requiring suppliers to report their carbon footprint data to us to improve the accuracy of the carbon measurement and engaging with suppliers to support our net zero goal.
4. All suppliers to have produced their own net zero plan by 2030 latest.
5. Investigate a new partnership which will help us determine our offsetting approach for 2024 and future years with the aim to fully offset emissions.

## **Declaration and Sign Off**

This carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans. Emissions Have been reported and recorded in accordance with the published reporting standard for the Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of scope 3 emissions have been reported in accordance with the published reporting standard for the Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard

This carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body)

Signed on Behalf of the Supplier

Niki Roper
